Human Placenta Extracts

PLACENTEX 50% 3ml ampoles

Human placenta contains numerous nutrition and vitamins essential for a fetus to grow, as mothers raise them through their placentas for about 10 months. Placenta Extracts is the formula that extracted from placenta of human. There are proteins, amino acid, vitamins and minerals which are beneficial to our body.

The nutrition and vitamins extracted from the placenta is what we call 'The Placenta Extracts'. When we take the Placenta Extracts continuously, the body will begin to exhibit major noticeable changes like skin whitening, regaining of strength and vitality, increase in collagen formation, immune system boosting, faster healing of wounds, and slowing of the aging process.
